EQUISTE ITALIAN DECORATIVE SURFACES

Polished plaster is like
watching earth
on the walls

Lime is a Natural Bacteria Repellent The material is alkaline which makes it a natural bacteria repellent. It is also an effective mold killer.

Ecological Benefits

Lime can be recycled after reaching the end of its lifespan. The material is also carbon-neutral as it is not made on giant plants that emit tons of CO₂ into the atmosphere and lime is able to absorb carbon dioxide from the air.

Finally, this material does not release harmful substances, like VOCs

Concrete Natural

Traditional artisan craftsmanship with contemporary style to deliver truly distinctive and unique finishes suitable for both residential and commercial settings.
